

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

FRIDAY, JANUARY 24, 1919

CONTENTS

<i>The American Association for the Advancement of Science:—</i>	
<i>The Physiography of Vermont:</i> PROFESSOR GEORGE H. PERKINS	77
<i>What Kinds of Botany does the World need now?</i> PROFESSOR GEORGE J. PEIRCE	81
<i>David Ernest Lantz:</i> NED DEARBORN	84
<i>Professor Ludvig-Sylov:</i> PROFESSOR G. A. MILLER	85
<i>Scientific Events:—</i>	
<i>The British Glassware Industry; The Study of Industrial Fatigue; State Parks for Iowa; Plans of the Rockefeller Foundation.</i>	86
<i>Scientific Notes and News</i>	88
<i>University and Educational News</i>	91
<i>Discussion and Correspondence:—</i>	
<i>Eucalyptus never present in North America:</i> PROFESSOR EDWARD W. BERRY. <i>The Richardson Meteorite:</i> TERENCE T. QUIRKE....	91
<i>Scientific Books:—</i>	
<i>Cory's Catalogue of Birds of the Americas:</i> HARRY C. OBERHOLSER	93
<i>Special Articles:—</i>	
<i>Psychological Research in Aviation:</i> PROFESSOR KNIGHT DUNLAP	94
<i>The Mathematical Association of America:</i> PROFESSOR W. D. CAIRNS	97
<i>The American Society of Zoologists; Section F—Zoology of the American Association for the Advancement of Science:</i> PROFESSOR W. C. ALLEE	98

MSS. intended for publication and books, etc., intended for review should be sent to The Editor of Science, Garrison-on-Hudson, N. Y.

THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE THE PHYSIOGRAPHY OF VERMONT¹

At this time no discussion of many interesting though difficult and perplexing questions to which a study of Vermont physiography gives rise will be attempted, but simply a brief consideration of its most conspicuous features.

Geologically Vermont is one of the oldest parts of the country as it contains very little rock that was formed later than the Ordovician. The geological history of Vermont, like that of most regions, may be properly divided into several distinct periods.

The Adirondacks of New York on the west side of Lake Champlain are mostly Pre-Cambrian and at the same time, or probably somewhat later, but still in Pre-Cambrian time, a fold or folds, rose on the east and formed the first elevation of the Green Mountains. Thus the Champlain Valley with its present outline was established in this early period.

Pre-Cambrian rocks have been found in the Green Mountains in only a few localities, but as yet no extended study of these mountains has been made. When thorough investigation shall reveal their complete structure the backbone or axis of the Green Mountains will almost certainly be found to be of an age earlier than the Paleozoic.

At this time then there was the Adirondack ridge on the west and the Green Mountains ridge on the east and between them a strait or channel which connected New York Bay with the St. Lawrence Gulf. An era of erosion and subsidence followed and the great ocean rolled over the whole country east of the Adirondacks.

¹ Address of the vice-president and retiring chairman of Section E, Geology and Geography, American Association for the Advancement of Science, Baltimore, December, 1918.
